

What if a tenant can't maintain their garden?

It is a condition of the tenancy that any garden ground or drying green allocated to the tenant is maintained to a good standard. If tenants do not do this, a letter may be sent advising that Waverley Housing will do the work and charge the tenant accordingly.

In the event of an elderly or disabled tenant not being able to manage their garden, and there being no friend, neighbour or relative available to help, contact should be made in with their designated Housing Officer for other options to be explored.
